EDUCATION

HuaZhong University of Science and Technology (HUST） HUST, September 2015 - Present
B.S. in Optical and Electronic Engineering
Rank: 2/28
GPA: 3.94/4.00 or 92.4/100

REASEARCH

Generation of Orbital Angular Momentum(OAM) Beam Advisor: Shuhui Li, Assistant Professor
Undergraduate research assistant HUST, October 2016 - August 2017

* Established optical system for beam transfer
* Developed fusion splicer's manual mode
* Assisted a MS student to finish asymmetrical fusion experiment

Optical Tweezer and Spanner Advisor: Shuhui Li, Assistant Professor
Undergraduate research assistant HUST, July 2017 - August 2018

* Designed and optimized structure for optical lens with Matlab and FDTD
* Explored the way of fabricating fiber lens via fiber fusion splicer
* Experimentally realized stable particle trapping and rotation
* Wrote paper

Fault Detection Based On POTDR Advisor: Ming Tang, Professor
Undergraduate research assistant HUST, June 2018 - Present

* Built simulation environment about signal transmission with Matlab
* Used POTDR to realize distributed fiber sensor
* Combined with Kalman filter

Microcontroller's Application Designing Project Advisor: YuBin Wu, Senior Engineer
Undergraduate research assistant HUST, April 2018 - July 2018

* Did schematic, PCB design, circuit soldering
* Realized arbitrary waveform generation function by coding in Keils 4
* Developed GUI for PC controlling in Matlab

HONORS/AWARDS

"Outstanding Student" HUST, September 2017
"Scholarship of Academic Excellence" HUST, September 2017

PUBLICATIONS

Paper
